

Features

- Smart size, Higher power density
- The maximum efficiency is 95.5% online mode
- Max charge current is 12A, 1-12A adjustable(long run model)
- Battery voltage: 192Vdc (16 batteries)
- Wide input voltage range(110-300VAC)
- Wide input frequency 44-56HZ
- Output 200Vac/220Vac/230Vac/240VAC can be set up.
- Power factor:0.9
- Output Accuracy $\pm 1\%$
- High overload capacity

6KVA - 10KVA RACK TYPE

Introduction

This Online Series is an uninterruptible power supply incorporating double-conversion technology. It provides perfect protection specifically for computer equipment, Communication Systems to computerized instruments. The double-conversion principle eliminates all mains power disturbances. A rectifier converts the alternating current from the utility power to direct current. This direct current charges the batteries and powers the inverter. On the basis of this DC voltage, the inverter generates a sinusoidal AC voltage which is constantly powering the loads. Computers and Peripherals are thus powered entirely by the UPS. In the event of power failure, the maintenance-free batteries power the inverter.
